TECHNICAL BROCHURE

BEE COME

SPECIAL PRODUCTS

Special preparation attracting pollinating insects (bees, bumblebees, etc.).

✓ **GUARANTEED COMPOSITION**

Bee attractant: Mixture of selected saccharides (70%) and amino acids (10%).

✓ **CHARACTERISTICS**

Contains wetting agent and dispersant

Exclusive Seller: FARMA-CHEM SA

✓ **RECOMMENDED USES AND DOSAGES:**

Tree crops (Apples, Pears, Peaches, Apricots, Nectarines, Plums, Olives, Almonds etc.):

Foliar application with 0.5-1 kg / 1000m². Application at the beginning of flowering and repetition in the middle of flowering.

Strawberries: Foliar application with 0.5-0.8 kg / 1000m². 5-6 applications during the growing season. 1st application at the appearance of the first flowers.

Watermelons, Melons: Foliar application with 0.5-1 kg / 1000m². 2-3 applications at the beginning and middle of flowering.

Vegetables: Foliar application with 0.5-0.8 kg / 1000m². 2-3 applications during the growing season, at the beginning and middle of flowering.

Clover - Lucerne: Foliar application with 0.5 kg/1000m². 2-3 applications during the growing season. 1st application at the beginning of flowering and repetitions in the middle and at 70% of flowering.

✓ **ADVANTAGES:**

Its application on crops significantly increases the attractiveness of flowers for bees and other pollinating insects, resulting in greater activity and frequency of flower visits, leading to maximization of pollination and increase in total production. The product is intended for use during flowering of cultivated plants.

✓ **TEMPORAL STABILITY OF PREPARATION - STORAGE CONDITIONS:**

In its original packaging, closed, in a cool and well-ventilated environment.

- *To avoid risks to human health and the environment, please follow the instructions for use.*
- ***ATTENTION:** Always read the label and product information before each use. See warning phrases and symbols before using the products.*
